SUBJECT INDEX, VOLUME 14

Barus effect, 545
Clay soil, behavior of, 375
Couette flow, 585
Damped wave equation, 239
Deformation, finite, 297
  uniaxial and biaxial, 117
Die swell, 393, 409
Disperse systems, 275
Dispersions, Casson equation for, 617
Elasticity, static boundary value problems in, 149
Epoxy resin, 253
Ethylene-propylene-diene polymers, 83
Exit pressure, 393, 409
Finite strain, 441
Fluid, polar, 219
  pressure drop in, 135
Heat transfer, 307
Hydrostatic pressure, 159
Integral equations, numerical methods for, 19
L/D ratio, effect on elastic properties, 393
Linear viscoelasticity, limits of, 253
Linear viscosity, application of Prony series to, 573
Liquid films, visco-elastic behavior of, 77
Material functions, relations between, 425
Membranes, inflation of, 159
Molten polymers, die swell in, 519
Newtonian fluids, material functions for, 461
Particles, dilute suspension of, 319
Piecewise continuous excitations, 1
Polar fluid motions, 335
Polymer extrusion, shear strain and Barus effect in, 545
Polymer melt die swell, determination of, 213
Polymer melts, flow of, 393, 409
Polymer solutions, dilute, 307
  rheological properties of, 185
Polypropylene, melt transitions of, 49
Polystyrene solutions, streaming birefringence of, 65
Pressure measurements, intrinsic errors for, 419
Prony series, 573
Relaxation spectrum, 605
Reynolds-Orr energy equation, 335
Rubber, extension of, 509
Secondary normal stress, 409
Shear strain, 545
Static boundary value problems, 149
Strain rate, 441
Stress-strain relations, 297
Suspensions, fluid, 39
  apparent viscosity of, 351
Viscoelastic fluids, stability of, 585
  materials, nonlinear behavior of, 275
  solids, constitutive equations for, 117
  tests, 441
Viscometric flows, stress functions in, 483
Wave phenomenon, 307
Weissenberg rheogoniometer, modifications of, 555

TRANSACTIONS of the SOCIETY OF RHEOLOGY

CONTENTS

Vol. 14, Issue Nos. 1–4, 1970

Issue No. 1

K. Yagii and N. W. Tschoegl: Response of Viscoelastic Materials to Piecewise Continuous Excitations 1

R. I. Tanner and G. Williams: Iterative Numerical Methods for Some Integral Equations Arising in Rheology 19

S. J. Allen and K. A. Kline: Fluid Suspensions: Flow Near an Oscillating Plate 39

C. L. Sieglaff and K. J. O'Leary: Melt Transitions of Polypropylene ... 49

P. Munk and A. Peterlin: Time Dependence of Streaming Birefringence of Polystyrene Solutions in Aroclor 65

E. J. Dickinson: The Visco-Elastic Behavior of Confined Liquid Films in the Direction Normal to the Plane of the Film 77

C. K. Shih: The Effect of Molecular Weight and Molecular Weight Distribution on the Non-Newtonian Behavior of Ethylene-Propylene-Diene Polymers 83

Issue No. 2

Charles W. McGuirt and George Lianis: Constitutive Equations for Viscoelastic Solids under Finite Uniaxial and Biaxial Deformations ... 117

J. Larrain and C. F. Bonilla: Theoretical Analysis of Pressure Drop in the Laminar Flow of Fluid in a Coiled Pipe 135

K. C. Valanis and Paul J. Blatz: An Incremental Method for the Solution of Static Boundary Value Problems in Finite Elasticity 149

L. K. Yu and K. C. Valanis: The Inflation of Axially Symmetric Membranes by Linearly Varying Hydrostatic Pressure 159

Ron Darby: Transient and Steady State Rheological Properties of Very Dilute Drag Reducing Polymer Solutions 185

C. D. Han and M. Charles: A Method for the Determination of Polymer Melt Die Swell 213

C. J. Pennington and S. C. Cowin: The Effective Viscosity of Polar Fluids 219

Julian L. Davis and Edward L. Reiss: An Asymptotic Analysis of the Damped Wave Equation 239

O. Ishai and S. R. Bodner: Limits of Linear Viscoelasticity and Yield of a Filled and Unfilled Epoxy Resin 253

Shigeharu Onogi, Toshiro Masuda, and Takayoshi Matsumoto: Non-Linear Behavior of Viscoelastic Materials. I. Disperse Systems of Polystyrene Solution and Carbon Black 275

Issue No. 3

Edward C. Ting: Stress-Strain Relations of Thermorheologically Simple Materials under Finite Deformation 297

J. S. Ultman and M. M. Denn: Anomalous Heat Transfer and a Wave Phenomenon in Dilute Polymer Solutions 307

P. N. Kaloni and C. N. DeSilva: On the Rheology of Dilute Suspensions of Rigid Particles 319

Kenneth A. Kline: The Reynolds-Orr Energy Equation, with Applications to the Stability of Polar Fluid Motions 335

V. Seshadri and S. P. Sutera: Apparent Viscosity of Coarse, Concentrated Suspensions in Tube Flow 351

Joseph B. Adeyeri, Raymond J. Krizek, and Jan D. Achenbach: Multiple Integral Description of the Nonlinear Viscoelastic Behavior of a Clay Soil 375

C. D. Han, M. Charles, and W. Philippoff: Rheological Implications of the Exit Pressure and Die Swell in Steady Capillary Flow of Polymer Melts. I. The Primary Normal Stress Difference and the Effect of L/D Ratio on Elastic Properties 393

C. D. Han and M. Charles: Rheological Implications of the Exit Pressure and Die Swell in Steady Capillary Flow of Polymer Melts. II. The Secondary Normal Stress Difference 409

Elliot A. Kearsley: Intrinsic Errors for Pressure Measurements in a Slot along a Flow 419

R. R. Huilgol: Relations between Certain Non-Viscometric and Viscometric Material Functions 425

Issue No. 4

Ronald J. Flowers and George Lianis: Viscoelastic Tests Under Finite Strain and Variable Strain Rate 441

John M. Dealy: Material Functions for Generalized Newtonian Fluids ... 461

R. I. Tanner: Some Methods for Estimating the Normal Stress Functions in Viscometric Flows 483

Robert W. Penn: Volume Changes Accompanying the Extension of Rubber 509

William W. Graessley, Steven D. Glasscock, and Richard L. Crawley: Die Swell in Molten Polymers 519

E. B. Bagley and H. J. Duffey: Recoverable Shear Strain and the Barus Effect in Polymer Extrusion 545

K. H. Lee, L. G. Jones, K. Pandalai, and R. S. Brodkey: Modifications of an R-16 Weissenberg Rheogoniometer 555

J. E. Soussou, F. Moavenzadeh, and M. H. Gradowczyk: Application of Prony Series to Linear Viscoelasticity 573

L. V. McIntire and W. R. Schowalter: Stablity of Viscoelastic Fluids: Plane Couette Flow with Superposed Temperature Gradient 585

Mitsuzo Shida and Romesh N. Shroff: Shear Rate Dependent Relaxation Spectrum: Conversion from Dynamic Viscosity to Steady Flow Viscosity for Polyethylene Melts 605

NOTE:

Takayoshi Matsumoto, Akira Takashima, Toshiro Masuda, and Shigeharu Onogi: A Modified Casson Equation for Dispersions 617
